Overview

When will the VAT charge be removed for battery energy storage systems?

As of 1 February 2024, the UK government has removed the VAT charge for domestic battery energy storage systems (BESS) under any circumstance. The policy change, initially announced in December 2023, followed a lengthy campaign by both Solar Energy UK and parliamentarians to include retrofitted BESS in the 20% tax exemption.

Are battery storage projects eligible for tax relief?

Tax relief eligibility for battery storage Projects The expanded tax relief encompasses three main categories of battery storage projects, each contributing towards the enhancement of the UK's energy grid's resilience and sustainability:

- Battery storage integrated with Solar PV: Enhancing solar energy generation with storage capabilities.

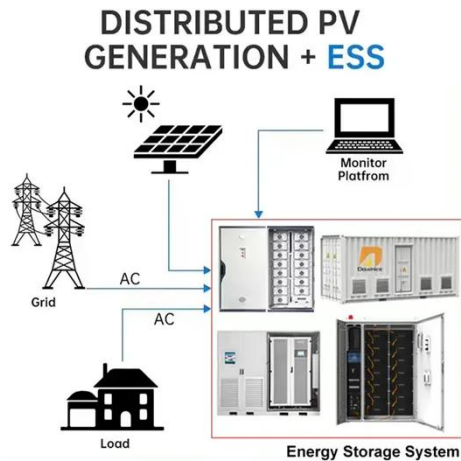

Why is VAT extending to energy-saving materials?

The policy's roots can be traced back to the government's Spring Statement of 2022, which saw the initial extension of VAT relief to energy-saving materials (ESMs), hailed for its progressive stance. However, it quickly became evident that further expansion was necessary to support the UK's transition to cleaner energy sources sufficiently.

Are energy saving materials subject to VAT?

“Under current rules, the fact that energy saving materials are frequently installed at the same time as wider heating measures, such as full central heating systems, prevents the reduced rate from being applied at all, meaning they are subject to 20 per cent VAT.”

VAT income tax for energy storage projects

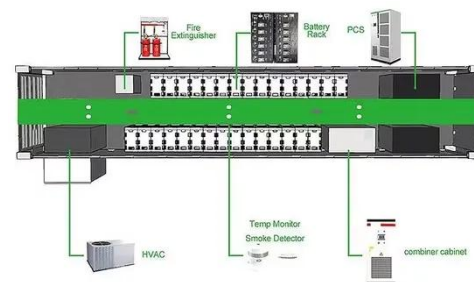

Tax and Energy Series : Finland

Regarding energy sector trends, solar power production in Finland has seen a marked increase in recent years. Additionally, there is growing interest in investments in ...

The economic impact of solar and battery storage
