VAT on solar module inverters

Overview

Do solar panels come with 0% VAT?

You can only get this 0% rate if you purchase your equipment from the same company that you use to install it. So if you buy solar panels from one company, then hire a different firm to install them, the installation will come with 0% VAT – but the original purchase won't. And the 0% VAT rate doesn't just apply to solar panels and batteries.

Is there VAT on solar panels in the UK?

There's no VAT on solar panels or storage batteries across the UK for all households and charitable bodies. This 0% rate will last until at least 31 March 2027, when it's set to rise to 5%.

How much does a 0% VAT Solar System cost?

The 0% VAT rate has made solar panels slightly cheaper, but not by much. For example, under the old 5%–20% VAT rate, a 3.5 kilowatt peak (kWp) solar PV system (suitable for a three-bedroom house) would cost around £7,860 in 2022. Under the current rate of VAT, that same system would cost around £7,026.

What is the VAT rate on solar panels?

The old VAT rate on solar panels was either 5% or 20%, depending on the situation. Installations would come with a 5% VAT rate if they were carried out at a household with a resident who was aged 60 or over or received a qualifying benefit.
