# **Vienna solar Energy Storage Project**

## Overview

---

Why should you choose a solar power plant in Vienna?

Our solar power plant in Vienna's Liesing provides the optimum environment in the city for species requiring protection. Our citizen solar power plants allow people to financially participate in PV systems, benefiting from a secure investment and favourable tariffs.

What is Vienna's first solar roof?

Vienna's first solar roof is made with special bifacial glass-glass solar modules which generate power from the top and the bottom. The city development area VIERTEL ZWEI is home to Vienna's first energy community allowing residents to trade self-generated solar power. Wien Energie offers district cooling on hot days.

What is Wien energy & how does it work?

Wien Energie offers district cooling on hot days. This smart technology uses waste heat to power the cooling machines. The plant resembles an oversized kettle that converts excess electricity into CO2-neutral heat and maintains stability in the grid.
