

**BLINK SOLAR**

# **Vietnam Communication Digital Cluster Base Station**

## Overview

---

Will data centers be the backbone of Vietnam's digital capabilities?

Large-scale data centers adhering to green standards As Vietnam's data center economy is forecasted to reach US\$1.03 billion in growth by 2028, data centers will serve as the backbone of Vietnam's digital capabilities. The Master Plan emphasizes the need to create data centers that adhere to green standards and energy-efficient practices.

What is Vietnam's Information & Communication Infrastructure Master Plan?

Vietnam's Information and Communication Infrastructure Master Plan includes the development of high-speed internet, green data centers, and specialized IT parks, while also prioritizing comprehensive cybersecurity measures to position the country as a prominent hub for network security in Asia by 2030.

Which GHz band is used for 5G in Vietnam?

1.3.1 2.6 GHz and 3.5 GHz bands springboard 5G in Vietnam The 3.5 GHz band (n77/78), which is globally harmonised for 5G, has been the basis for the pioneer phase of 5G rollouts in many markets.

What is Vietnam's Digital Infrastructure Strategy for 2025?

Vietnam's Digital Infrastructure Strategy for 2025, with a vision toward 2030, underscores that "digital infrastructure is the backbone of the economy." It sets a target that by 2025, all localities, high-tech zones, IT hubs, R&D centres, innovation hubs, industrial parks, railway stations, seaports, and airports will have access to 5G services.

## Vietnam Communication Digital Cluster Base Station
