Waterproof UPS Uninterruptible Power Supply

Overview

What is a UPS (uninterruptible power supply)?

A UPS (uninterruptible power supply) sits between an alternative source of power – such as a standby diesel generator – and protected loads.

Does upspro support small?

Support small. Learn more The UPSPro series outdoor systems are designed for applications that require a backup power source in order to maintain uninterrupted service in the event of AC power failure. The system is powered over a CAT5 network cable via Power over Ethernet (PoE) using a Power Supply and PoE Inserter (included).

What is an outdoor UPS power system?

Encased in a durable IP68 housing, it guarantees durability even in harsh weather conditions. With a wide input voltage range (100 to 240V AC) and operating temperatures from -4°F to 140°F, the Outdoor UPS Power System ensures consistent performance and system reliability in inclement outdoor environments.

What are outdoor UPS?

Outdoor UPS are rugged back-up power supply systems that are designed to weather the elements in harsh outside locations.
