West Asia 1 7MW energy storage project

Overview

Which countries are deploying a battery energy storage system (Bess) in 2025?

Spanning Australia, Japan, Southeast Asia and South Asia, these deployments represent a substantial contribution to 16 GWh of new Battery Energy Storage System (BESS) capacity projected to be added in APAC (excluding China) in 2025, according to BloombergNEF.

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

What is the largest energy storage order in Southeast Asia?

Citicore's 1.5 GWh order is the largest one in Southeast Asia, while Fidra Energy's 4.4 GWh order breaks the European record. Chinese companies such as Huawei, Envision Energy, CORNEX and Sunwoda have each secured major energy storage contracts in the Philippines, South Africa, Italy and Australia.

Does China's energy storage capacity exceed pumped storage capacity?

China's installed capacity of new-type energy storage exceeded that of pumped storage for the first time at the end of 2024, according to the recent data release of China Energy Storage Alliance (CNESA).
