What is an uninterruptible power supply?

An uninterruptible power supply, commonly known as UPS Power Supply is easy to install a device that is designed to provide power to your computers, servers, server rooms and data centres in case of main energy failure, electrical surge or unexpected energy cut off.

Where can I buy UPS - uninterruptible power supplies?

Find a huge range of UPS - Uninterruptible Power Supplies at Farnell® UK. We stock a large selection of UPS - Uninterruptible Power Supplies, including new and most popular products from the world's top manufacturers including: Apc, Schneider Electric, Phoenix Contact, Siemens & Ea Elektro-automatik Were these search results relevant?

.

What is a 1kva rated UPS system?

1kVA rated UPS systems available from Server Room Environments include line interactive and on-line uninterruptible power supply systems. UPS rated at 1000VA will have a different output Watts rating dependent upon the Power Factor used by the UPS manufacturer. Please check the individual products for their kW rating.

How many watts can a 1kva Ups supply?

If you are sizing your UPS load in Watts or kW (1000Watts), the UPS should be suitably rated. A 1kVA UPS may be rated at unity power factor (1PF) which means that the UPS can supply 1kVA/1kW of load. If the power factor is less (typically 0.9 or 0.8) then the Watt load should not exceed 900W or 800W etc.
