IP54 Protection Degree

Overview

What is a battery inspection checklist?

This detailed Battery Inspection Checklist ensures battery performance and safety. This checklist, which includes both visual and technical inspections, assists in identifying difficulties with mounting, cables, electrolyte levels, & voltage to ensure proper battery function.

What are the test items for incoming inspection of lithium-ion battery cells?

Through the tests of the automatic battery sorter and the battery cycler, the main core test items for the incoming inspection of lithium-ion battery cells have been completed. The remaining items are mainly inspected and sampled manually, such as size inspection and appearance inspection.

How is a lithium ion battery inspected?

The remaining items are mainly inspected and sampled manually, such as size inspection and appearance inspection. The size of lithium-ion battery cells is generally measured with a vernier caliper.

What is a battery inspection?

The first level of inspection involves a thorough visual examination of the battery's physical condition. This step checks for any mechanical or structural faults that could hinder performance. Mark "OK," "Not OK," or "N/A" in the appropriate boxes for each point.

What are the items in the appearance inspection of the battery cabinet?
