What are the essentials of energy storage systems for solar power?

Explore the essentials of energy storage systems for solar power and their future trends. Energy storage systems for solar energy are crucial for optimizing the capture and use of solar power, allowing for the retention of excess energy generated during peak sunlight hours for later use.

What are the different types of solar energy storage?

Thermal storage: Captures excess solar energy as heat for later use. Battery technologies: Store electrical energy for later consumption. Each storage type plays a crucial role in optimizing the utilization of solar power and ensuring energy independence, including systems like solar panels and battery storage.

What is energy storage?

Energy storage is a system that can help more effectively integrate solar into the energy landscape. Sometimes it is co-located with, or placed next to, a solar energy system, and sometimes the storage system stands alone.

Why are solar energy storage systems so popular?

Solar energy storage systems have become popular among homeowners and businesses seeking greater energy independence and solar backup power during grid outages. The federal investment tax credit (ITC) increased to 30% for solar systems and standalone battery storage, further fueling demand for various types of solar energy storage systems.

## Solar Integration: Solar Energy and Storage Basics

What Is Energy Storage? Advantages of Combining Storage and Solar Types of Energy Storage  
Pumped-Storage  
Hydropower  
Electrochemical Storage  
Thermal Energy Storage  
Flywheel Storage  
Compressed Air Storage  
Solar Fuels  
Virtual Storage  
The most common type of energy storage in the power grid is pumped hydropower. But the storage technologies most frequently coupled with solar power plants are electrochemical storage (batteries) with PV plants and thermal storage (fluids) with CSP plants. Other types of storage, such as compressed air storage and flywheels, may have different characteristics. See more on [energy.gov/consumerenergycenter](http://energy.gov/consumerenergycenter)
