What is the new energy storage plant

Overview

When is Tesla Shanghai energy storage megafactory launching production?

Tesla Shanghai energy storage Megafactory launches production on February 11. Photo: courtesy of Tesla. Tesla held a ceremony on Tuesday to mark the production launch of its Megapack energy storage plant in Shanghai's Lingang New Area, meaning Tesla's China operations has entered a new phase, the Global Times has learned.

Is the new megapack plant a milestone for Shanghai and Tesla?

"I believe the new plant is a milestone for both Shanghai and Tesla," the company's vice president Tao Lin told Xinhua in an exclusive interview. "In a more open environment, we can create a new Tesla speed at the Megapack factory, and supply the global market with large-scale energy-storage batteries manufactured in China," she added.

How big is the energy storage factory?

The energy storage factory covers an area of approximately 200,000 square meters, which is equivalent to the size of 30 standard soccer fields. It initially plans to produce 10,000 Megapack units a year, with a storage capacity of nearly 40 GWh.

Does Tesla have energy storage?

Tesla's deep involvement in the energy storage industry now rivals its electric vehicles in importance, Tao said, adding that its energy storage products are currently used in over 60 countries and regions. The U.S. company already has a factory for its Megapacks in California, which has an annual capacity of 10,000 units.
