What is the solar container outdoor power standard in Jakarta

Overview

Could local content requirements hamper the growth of Indonesia's solar capacity?

Local content requirements could hamper the growth of Indonesia's solar capacity. Image: Sun Energy. In June 2024, Indonesia issued rooftop solar PV system development quotas for state electricity company PLN between 2024 and 2028, aiming to add 5.75GW of capacity in the country.

How much solar power does Indonesia have?

According to research firm Rystad Energy, the installed rooftop solar capacity in Indonesia was only 0.192MWp as of May 2024. Indonesia has previously set a renewables target, hoping that it will cover 23% of its national energy mix by 2025.

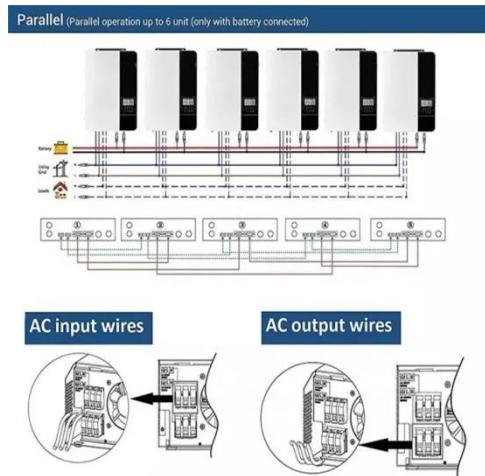

Is rooftop solar legal in Indonesia?

By understanding these licensing differences, building owners can install rooftop solar legally, in compliance with regulations, and maximize the benefits of solar energy. Minister of Energy and Mineral Resources (ESDM) Regulation No. 2/2024 sets new rules for rooftop solar power (PLTS Atap) in Indonesia.

What is Indonesia doing with solar energy?

The Indonesian government has moved forward with the amendment of Energy and Mineral Resources Ministerial Regulation No. 26/2021 on on-grid solar systems and energy distribution and eliminated a key provision that previously allowed homeowners with rooftop solar panels to sell excess energy back to the national electricity firm, PLN.
