

# Where are the Swisscom 5G base stations

## Overview

---

Does Swisscom have 5G?

The network technologies currently managed by Swisscom include 3G, 4G, 4G+, 5G, and 5G+. However, Swisscom has already announced that the Swisscom 3G network will only be active until the end of 2025. Swisscom 5G coverage is very extensive, reaching over 99% of the population with speeds of up to 1 Gbit/s by the end of 2022.

Who uses 5G in Switzerland?

To use the 5G standard, however, a device is required which can also use the new network. The largest mobile operators in Switzerland are Swisscom, Sunrise and Salt. These three companies also own the country's mobile networks. Other providers, such as UPC, Yallo or Wingo, also use the networks.

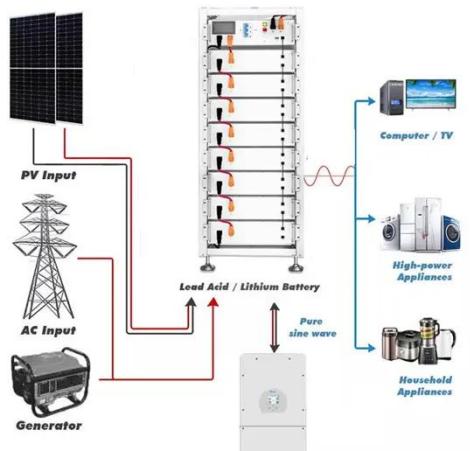

What mobile networks are available in Switzerland?

Check Swisscom, Salt and Sunrise mobile network coverage and discover the best network for your mobile in Switzerland. This map displays the Swiss locations where the 2G, 3G, 4G, and 5G signals of mobile networks are available.

Does Swisscom offer the best mobile network in Switzerland?

Swisscom's mobile network is the best in the country. Alongside the largest high-speed fibre-optic network, it is essential for Switzerland. Fast, sustainable, secure, and ready for the future, our network sets the benchmark in terms of coverage, availability, speed, and reliability.
