Which factories are there in Madrid s container battery factory

Overview

Does Spain have a battery factory?

Spain is a clear beneficiary of this mixed situation. Having its own battery factory with low-cost LFP cells is a real competitive advantage for the three Stellantis plants in Zaragoza, Vigo and Madrid – especially as Stellantis has already announced that it will build small electric cars based on the upcoming STLA Small platform in Spain.

Will stellantis build a new EV battery factory in Spain?

Madrid (AFP) – Car giant Stellantis and Chinese manufacturer CATL said Tuesday they would build a \$4.3-billion factory to make electric vehicle batteries in Spain, the latest bid to boost Europe's troubled EV drive. They said they aim to start production by the end of 2026 at the site in the northern city of Zaragoza.

Will CATL be a partner for LFP batteries in Spain?

In November 2023, the car manufacturer officially announced its partnership with CATL for LFP batteries in Europe, and Spain became the subject of focus when, in January 2024, CATL was also mentioned in the Spanish media as a likely project partner in the country.

When will stellantis & CATL open a battery plant in Spain?

Following the official announcement that Stellantis and CATL will open a battery plant in Spain, Jorge Azcon, President of the Autonomous Community of Aragon, provided further details. Construction work is scheduled to begin in June 2025 and should be completed in March 2028. The plant should have an annual capacity of 50 GWh.

Which factories are there in Madrid s container battery factory
