# Which factory produces 21700 batteries

## Overview

---

Who makes 21700 battery cells?

In the research and production of 21700 battery cells, BAK Battery has consistently maintained an advanced layout and technological leadership. They continuously break through the capacity ceiling of 21700 battery cells, successively releasing and mass-producing 21700-5.0Ah and 21700-5.3Ah battery cell products.

What are 21700 batteries?

21700 batteries are lithium rechargeable batteries that come in various versions with differences in battery capacity, pulse rate, drain current, charging current, and battery terminals, among other things.

Are 21700 battery cells a good choice?

In the past two years, 21700 battery cells have gained widespread use in the small power market due to their higher energy density and overall cost advantages compared to traditional 18650 cells.

How big is 21700 battery in China?

The total planned scale of 21700 will reach 7GW. At present, it has formed supporting cooperative relations with China's mainstream new energy smart car companies, and continues to expand strategic customers, emerging Internet car companies, etc. Jiangsu Zhihang in Top 10 21700 battery manufacturers in China was established in July 2012.
