Can a residential roof install solar panels?

Your residential roof, made of asphalt shingles, can handle a solar panel installation quite well. If you've got a metal, clay tile, rubber, or standing seam roof - these materials will also handle solar panels. Do you own your home?

How old is your roof?

Can you put solar panels on a tile roof?

Tile roofs can break when solar energy systems are installed. Therefore, you will need to contact an experienced contractor to put solar panels on this roof. One of the greatest roof types for solar panels is tar and gravel. But since they're flat, you'll need more brackets to get the right slopes.

Which roof is best for a sunny area?

Given their expanded lifespan and reflection, metal roofs are great in sunny areas. Shingles are cost-effective and easy to put on a roof. While tile roofs are durable, installing solar panels on them can be tricky. Rooftops made of tar and gravel are cheaper to install, but flat surfaces need more change.
