Overview

Does Ireland have a 5G network?

As part of the 5G Action Plan for Europe, issued by the European Commission in 2016, Ireland and other European member states have made radiofrequency (RF) spectrum available for 5G in order to facilitate the deployment of this technology. Since 2019, several mobile operators have started rolling out 5G networks throughout Ireland.

Does eir have a 5G network in Ireland?

Eir, Ireland's Incumbent telecommunications provider, operate a 2G to 5G network in the country. Eir use Huawei as their 5G and modern 2G to 4G RAN vendor. Some flagship 5G sites and configurations are shown below. An Eir rooftop 5G mast with Huawei 5G Active Antenna Unit (AAU), Huawei six band passives and respective Remote Radio Units visible.

Which GHz band is used for 5G in Ireland?

The 3.6 GHz band is similar to the frequencies currently being used for 4G while 700 MHz was previously used for analogue TV broadcasting. 26 GHz: This higher frequency band is not currently used for 5G in Ireland and is not expected to be deployed for several years.

What is the European 5G Observatory?

The European 5G Observatory tracks progress in 5G infrastructure deployment across the EU and other regions worldwide according to base stations deployment, edge nodes and infrastructure sharing agreements. Source: IDATE estimates and regulators' data. Reporting period: at December 2024. Source: IDATE estimates and regulators' data.
