Wind-solar hybrid 220v inverter

Overview

What is a hybrid inverter?

A hybrid inverter is essentially two inverters in one. It combines a solar inverter and a battery inverter into one simple unit. These advanced inverters use solar energy to power your home, charge a battery, or send excess energy into the electricity grid. Most hybrid inverters can also provide emergency backup power during a blackout.

How MPPT inverter can be used for wind turbine & solar panel?

This inverters have several MPPT inputs could be used for wind turbine and solar panel. A battery bank can be connected on the inverter to store the energy produced by the energy source (wind and solar). The energy will be stored in the battery firstly, then power the load. Extra energy will be transmitted to the state grid.

How do I select a hybrid inverter?

When choosing a hybrid inverter, it's important to consider its capabilities and how they can be customized to suit your needs and preferences. To help you make an informed decision, consider consulting with an accredited solar and battery specialist like Jason Svarc, who has over a decade of experience in designing and installing solar and battery systems.

What type of inverter can be used on Aeolos wind turbines?

It can be used on Aeolos 1kW, 2kW, 3kW, 5kW and 10kW wind turbine system with CTW inverters. The dump load resistance is combined in one box and isolate with the control panel. In the premise of safety, it saves the installation space. Micro Wind Converter and Wind-Solar Hybrid Storage Inverters Micro Converter 1kW/ 2kW
