Wide Temp:
-20°C to 55°C

Overview

Does Worx have a 20v battery?

One of the biggest perks of the Worx 20V lithium battery is how much ground it covers. Thanks to the Worx PowerShare system, you can run a whole fleet of tools off just one battery — no faff, no fuss. What is PowerShare?

PowerShare is Worx's swappable battery platform that lets you power over 40 different tools with the same 20V battery.

What is a Worx battery?

WORX products have received awards and glowing reviews across the globe. This 4.0 Ah battery delivers up to twice the runtime of our standard 2.0 Ah Power Share battery. You don't have to deal with the fumes of gas-powered tools—you're neighbors will appreciate that. And rechargeable batteries are more cost-effective than gas.

Do you need a Worx battery?

But if you're working often or rely on your tools to just get the job done without faff, the official Worx battery gives you that peace of mind. Most people find the sweet spot is running a mix of both: one official Worx 20V lithium battery to lead the charge, and a third-party spare to fill the gaps when needed.

Should you buy a WRX 20V lithium battery?

Whether you're deep in weekend DIY or giving the lawn a quick once-over, having the right battery combo makes all the difference. The Worx 20V lithium battery gives you reliability, freedom, and a bit of future-proofing — all in one solid bit of kit.
